Course Title: Essential Strategies and Practices for child development to enhance capacity building.

Course Description: This course is designed to enhance the competencies of child development professionals through comprehensive activities of advanced strategies and practices. The curriculum focuses on improving the quality of child development strategies, enhancing developmental supports, and utilizing innovative approaches to uphold the highest standards of child development services.

Course Objectives:

1. Understand the theoretical foundations and principles of child development.
2. Develop and implement effective strategies to support children's development.
3. Engage collaboratively with families, communities, and other professionals.
4. Advocate for policies that support child development and their education.
5. Integrate technology responsibly in the practice of child development.
6. Employ research and evidence-based practices to enhance service delivery.
7. Implement capacity-building strategies that enrich educational settings and community programs.
