Syllabus for Volunteer Training

Child Development Strategies in the Contemporary Problems

Topic: Child Development Strategies in the Contemporary Problems

Date of commencement: 17 November 2023

Course schedule: Every Friday and Saturday

DESCRIPTION OF THE TRAINING

This training emphasizes the concurrent situation of the child problem which creates negative barriers to their rights and responsibilities. Child development issues are always considered challenging issues now and forever. In the contemporary situation of the globe, the child's issues play an important role where the Pandemic – 19 affects the total situation of the world very badly; on consideration of the circumstances, this is our ethical responsibility to make a positive effort for the children. This training represents three modules of the situation; the first is the socialization process which means that on the changes; the role of family, institution, friends and others and good linkage of the nursing system with the environment. Second is applying national and international planning, policy and legislation which can keep a great contribution to eradicating child abuse, trafficking, and drug addiction and so on. The third is the motivation and counseling process which is related to psychological support, and abstaining from deviant behavior and anti-social activities. This training session will focus on community and institutional support to play an important role in preserving the rights of the children.

IN A NUTSHELL THE TRAINING

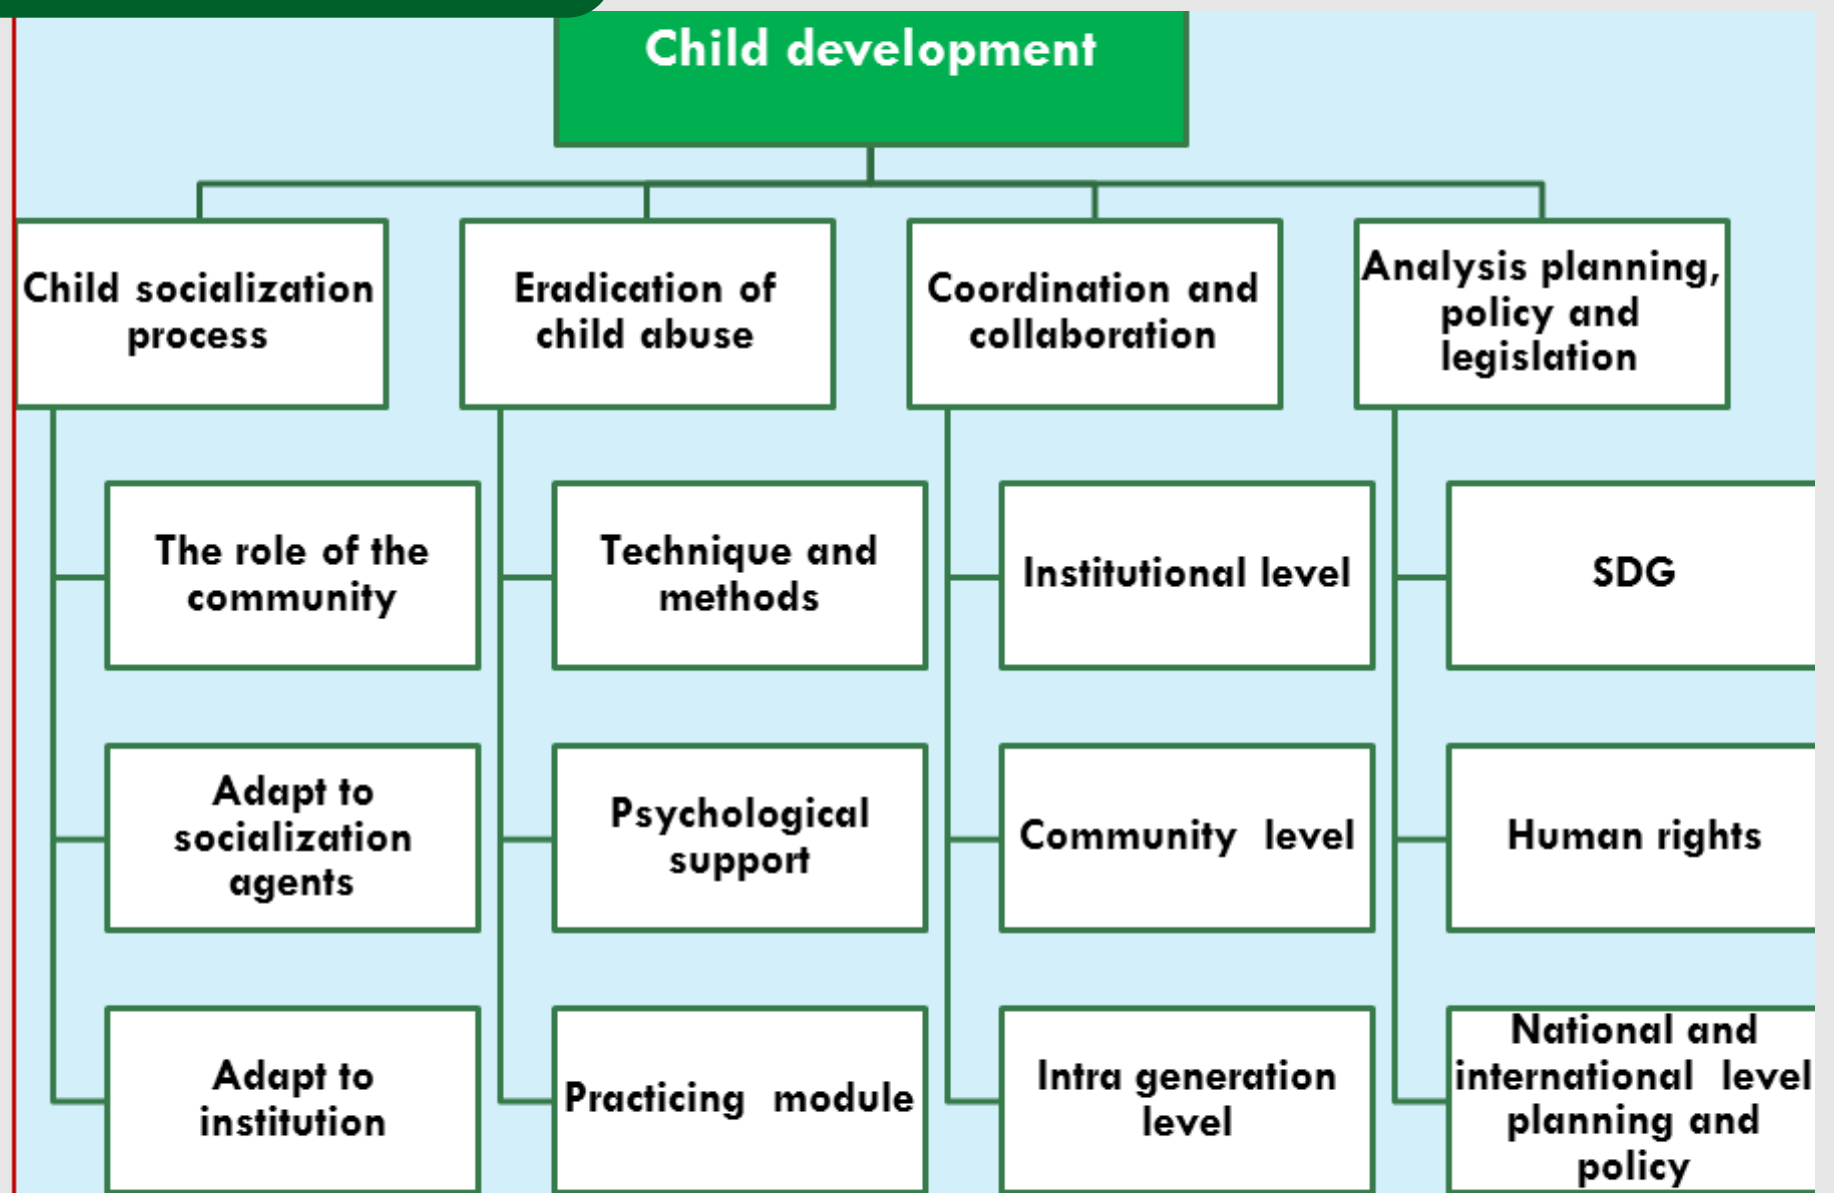

No children are left behind in the development

OBJECTIVES OF THE TRAINING

- To make awareness about the children's security and socialization about the contemporary changes of the world.
- To create effective linkage between the community development tools and social protection strategies of the surroundings.
- To train about child behavior, motivation and counseling of the child development.
- To learn about strategies for eradicating child abuse, disparity and downtrodden from the society and return them to mainstream of the society.
- To instruct the guidance when it is necessary to adapt to the children in the crises.
- To train about the conception of national and international planning, policy and legislation.

SCOPE OF THE TRAINING

Child development is one of the raising issues of the concurrent world. From the perspective of the circumstances, a set of holistic approaches are important to implement the program successful. There are three pillars should be followed to implementing the the program. these three pillars is enact the planning, policy and legislation, coordination and collaboration of the different stakeholders and the third is counseling, consoling and rehabilitation system of the of the child.
